Made in India

Established in 2024, Sufi Overseas is an Indian export house specializing in the global supply of eco-friendly tableware and packaging, jute products, premium terry towels, and agricultural superfoods such as millets and moringa powder. We proudly serve HORECA businesses, importers, wholesalers, retailers, corporate clients, and institutional buyers across six countries, delivering carefully sourced Indian products backed by dependable logistics, rigorous quality standards, and a commitment to long-term business partnerships. Every partnership is built on a foundation of quality, transparency, and an unwavering commitment to customer satisfaction.

OUR STORY

Sufi Overseas proudly builds upon the legacy of Shri Rama Krishna Jewellers, an established wholesale gold jewellery enterprise in Aligarh, India, founded in 1994, which has served customers with integrity and excellence for over three decades. Inspired by the same values of trust, transparency, and long-term relationships, Sufi Overseas extends this entrepreneurial heritage into international trade—combining Mr. Om Prakash Gupta's decades of business experience with a modern, globally focused approach to sourcing, quality control, and customer service. Today, we remain committed to representing the finest of Indian craftsmanship and manufacturing while delivering dependable export solutions to businesses across international markets.

WASTE TO WEALTH

Sugarcane bagasse is the fibrous residue that remains after sugarcane stalks are crushed to extract their juice. Once regarded as agricultural waste with limited commercial value, this abundant natural resource is now being transformed into premium, food-grade tableware through innovative manufacturing processes. By giving new purpose to a by-product of the sugar industry, bagasse demonstrates how sustainable innovation can convert waste into valuable everyday products.

Unlike conventional disposable products manufactured from virgin plastics or timber, bagasse tableware is produced using an already available agricultural by-product, reducing the need for additional raw material extraction. The result is a durable, heat-resistant, and food-safe alternative that delivers the performance expected by modern food service businesses while supporting more responsible resource utilization.

By repurposing agricultural waste into high-quality disposable tableware, businesses actively contribute to a circular economy—where resources are reused instead of discarded. This approach not only minimizes dependence on fossil fuel-based plastics but also helps reduce agricultural waste, lower environmental impact, and encourage more sustainable consumption practices. Every bagasse product represents a small yet meaningful step toward a cleaner, greener future.

AGRICULTURAL BY-PRODUCT

Made from renewable sugarcane bagasse that would otherwise have limited economic value.

CIRCULAR ECONOMY

Transforms agricultural residue into high-value products instead of waste.

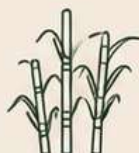

LOWER ENVIRONMENTAL IMPACT

Reduces dependence on conventional single-use plastic and virgin fibre products.

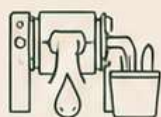

STRONG & FOOD SAFE

Designed for modern food service with excellent durability and performance.
